SUMMARY

Professional Summary

Mobile Apps Developer with 8+ years of experience in building Android and iOS applications using Kotlin, Flutter, and Ionic. Skilled in creating scalable, user-focused platforms—from UGC and live streaming apps to recruitment and analytics systems. Experienced across full-stack development with Laravel, Vue.js, and API integration. Passionate about crafting clean, efficient, and high-performance mobile experiences.

WORK EXPERIENCE

PT Datascrip, Jakarta

Jan 2026 - Present

Apps Developer - Corporate Retail Sales, DatascripMall.ID

- Developing native e-commerce mobile applications for Android using Kotlin and iOS using Swift.
- Integrating the application with Laravel REST APIs for authentication, products, categories, search, cart, wishlist, checkout, payment methods, order tracking, and customer dashboard features.
- Implementing UI/UX designs from Figma with accurate layout, styling, and interaction behavior.
- Managing application state and architecture with native Android and iOS development patterns.
- Integrating push notifications with Firebase Cloud Messaging or third-party notification providers.
- Optimizing performance through image caching, list virtualization, and lazy loading.
- Handling debugging, testing, bug fixing, and production builds, including Android APK/AAB and iOS TestFlight releases.
- Collaborating closely with the backend development team to align API contracts and delivery priorities.

PT MNC PICTURES, Jakarta

Mar 2020 - Oct 2025

Senior Mobile Apps Developer (Supervisor)

- Developed Klaklik, a UGC platform for novels, scripts, short stories, and comics.

- Built casting capability so users can upload audition videos and join online casting events.
- Implemented live streaming for real-time sessions with actors and artists.
- Integrated Google Play Billing so readers can purchase points to unlock premium chapters.
- Delivered upload modules, a news generator, and an audio player for listening to novels inside the app.
- Implemented analytics via REST API and Google Analytics to monitor user behavior.

• PT Empatix, Jakarta

Sep 2017 - Feb 2020

Mobile Apps Developer

- Developed Android & iOS apps with Ionic (Angular) for the Tix Job, Tix Facility, and Tix Analytics suite.
- Built Tix Job, a recruitment and employee placement platform featuring integrated performance analysis and reporting.
- Implemented backend APIs plus databases in Laravel and delivered complementary web modules using Vue.js.
- Integrated Google Play Billing for Android and shipped releases to both the Play Store and App Store.

• PT Waindo Specctera, Jakarta

May 2017 - Aug 2017

Android Developer

- Developed an Android mapping application for gas pipelines and gas station units.
- Implemented Google APIs for Places, Directions, Street View, and search autocomplete to power real-time navigation.

• Gunadarma University, Bekasi

Sep 2014 - Apr 2017

Library Staff

- Validated scientific writing and handled data entry into the system.
- Served borrowing and returning books.
